

CountIn — how the app works

CountIn is for recurring football groups. One person organizes. Everyone else RSVPs, shares the pitch cost, and gets told when something changes.

Live site: <https://countin.sspi.trade>

Money in CountIn is a **tracker only**. The app never takes a payment. Cash, e-transfer, and chasing unpaid amounts stay between players.

What you can do

You want to...	Use
Find or start a club	Home search, New club , or an invite link
Play one night	A weekly event (pickup)
Play the same nights for weeks	A season with a contract vote
Skip a contract night	Exchange request (ask everyone, ask one person, or open the waitlist)
Cover someone	Take this night only or Take over the contract
Split costs	Ledger
Talk in the group	Chat
Get DMs	Link the Telegram bot on Profile
Ask for help	Help on Profile

Accounts

Register needs name, email, password (at least 8 characters), and a Telegram username or numeric ID. Telegram is required so the bot can DM you later. After you register, open the bot and tap **Start**.

Log in with email and password.

Forgot password needs the email **and** the Telegram username on the account. You get a reset link in the in-app inbox. The link lasts one hour.

Profile (/app/profile)

- Change name, photo, and Telegram username or ID
 - Changing Telegram unlinks the bot until you Start again
 - WhatsApp is stored for later; delivery is not live yet
-

Clubs

A club is a private group with a public page, a UID (short code), and an invite link.

Create a club: name, description, pitch, timezone, currency, public or private, optional photo. You become the **owner**.

Join

Club type	How you get in
Public	Search by name or UID → Request to join → an admin approves
Private	You can find it by UID, but you only join with an invite link

First time in a club you must accept: credit is only a tracker; CountIn does not guarantee anyone pays.

Roles

Role	What they can do
Owner	Everything an admin can, plus edit club settings, regenerate the invite link, delete the club, make/remove admins, suspend, restore, and remove members
Admin	Create events and seasons, book the field, cancel, post costs, approve joins / guests / waitlist, add a member by email, change the club photo, see the full ledger
Member	RSVP, vote, chat, apply as occasional, claim exchanges, add guests when going
Suspended	Can still open the club and chat. Cannot vote, RSVP, or see poll voter lists until restored

The owner cannot be suspended or removed. Only the owner can change someone's role or remove them from the club.

Cancelled events, seasons, and nights are **hidden**. Opening an old cancelled link sends you back to the club home.

Pickup events (one night)

Admins create these from **New event**.

Typical flow:

1. Set a time, **or** start with a **time poll**
2. Members vote on the poll (if there is one)
3. Admin **locks the time** → RSVP opens
4. Members mark **Going** or **Not going** until the presence deadline
5. When enough people are going, the event is **ready to book**
6. Admin confirms the **field is booked**
7. After play, admin **posts the cost** → the ledger splits it

Guests: you must be going first. Name them (for example “Ali's friend”). They wait until an admin approves. Approved guests count as going and as a share of the cost (on the host).

Going count = going members + approved guests.

Statuses you will see: polling → open → ready to book → booked → completed (after cost) or cancelled.

Seasons (contract nights)

A season is a block of the same weeknights (for example Tue + Thu for six weeks). Nights **do not show** on the club home until two things happen:

1. An admin **closes the agreement**
2. An admin **creates the season nights**

1. Agreement

Everyone says **I agree to the contract** or **Not this season**.

- **In** → they will be contract players
- **Out** → they stay occasional for this season

The vote can stay open past the deadline until an admin closes it.

2. Rates

Admin sets:

- **Contract rate** — what a contract night costs (needed before replacements)
- **Occasional rate** — what a waitlist player pays (needed before waitlist approval)

3. Nights go live

Each date becomes its own event. Contract players are marked **present** on every future night automatically.

Who is who

	Contract	Occasional
On the sheet every night	Yes, as going	No — they apply per night
Skip a night	Send an exchange request	Not on the sheet
Cover a gap	—	Claim an invite, or apply to the waitlist
Pay	Prepaid contract (if the admin marked them prepaid)	Occasional rate to the admin if approved

Going rule: a contract player counts as going until they send an exchange request. Then they are **out**. The person who covers them counts as going (this night only, or as the new contract player).

Admins can also add a contract player later by email, with optional **Prepaid all sessions**.

Cancel the whole season, or **Cancel night** on one date. Both hide from the event list.

Exchange (can't make a contract night)

Only a contract player who is still **present** that night can send this.

Choice	Who is asked	Credit
Ask everyone	All occasional members	If someone claims, they pay the contract rate to you
Ask one member	One occasional player you pick	Same
Open the slot on the waitlist (no credit)	Anyone can apply on the waitlist	You are not credited

The person covering can:

- **Take this night only** — they are **Replacement • this night**. You stay on the season contract. Later nights are still yours.
- **Take over the contract** — they become the contract player from that night forward. You are off the remaining nights.

Both options post to **club chat**, the **notification inbox**, and **Telegram** (if the bot is linked).

A private ask still appears in chat (it names who was asked). Only that person can claim it from the night page. Everyone else just sees the chat line.

Waitlist without an invite: occasional players **Apply**. Admin approves. They pay the **occasional rate** to the admin. The absentee is not credited.

Polls

Two kinds:

- **Time poll** on a pickup event — pick when to play, then the admin locks it
- **Club poll** — any club question (from the club home)

Members vote and can **suggest** an extra option (admin accepts it). Admins can override or delete votes and delete the poll. Suspended members cannot vote or open the voter list.

Chat

Every club has a chat. Members (including suspended) can send messages, reply, and react (👍❤️😂🔥🏀👏).

Exchange requests and claims also show up here as messages from the person who did them.

Notifications

The bell opens a compact inbox (club photo, type icon, title, short body, relative time). Unread rows are highlighted. Tap a row to mark it read and open the related page. **Mark all as read** is at the top.

The same event is also queued for **Telegram**. WhatsApp uses the same pipeline but is off until it is wired up.

You only get Telegram DMs after:

1. The live site has the bot token and a public HTTPS URL
 2. You tap **Start** on the bot from Profile
-

Ledger

Club **Ledger** shows what you owe and what is owed to you (pending amounts).

Typical lines:

- Pickup cost split after the admin posts the total
- Occasional fee when a waitlist player is approved
- Replacement paying the contract player for that night
- Prepaid contract when an admin adds someone as prepaid

Admins see everyone's entries. A collector or admin can **mark paid**. CountIn does not move money.

Help

From Profile → **Help**: open a **Support** or **Feedback** ticket. You can reply until it is closed. Platform operators answer from a separate Ops site (not inside CountIn).

Screens (where to tap)

Place	What it is
/	Search clubs
/app	Your clubs
/app/c/{club}	Home: events, polls, season nights
/app/c/{club}/events/{id}	Pickup night
/app/c/{club}/seasons/{id}	Contract vote, rates, night list
/app/c/{club}/sessions/{id}	One season night (people, exchange, waitlist)
/app/c/{club}/chat	Club chat
/app/c/{club}/members	Squad, requests, owner actions
/app/c/{club}/ledger	Credits
/app/c/{club}/notifications	Inbox
/app/c/{club}/settings	Invite link, club details (owner)
/app/profile	You, Telegram, Help

Local demo (optional)

After `npm run dev` and `npx tsx scripts/seed.ts`:

Person	Email	Password
Alex (club owner)	alex@club.com	password123
Sam (member)	sam@club.com	password123

Demo club: **Tuesday Night FC** → `/app/c/tuesday-night-fc`
